**Catalogue**

*"Everything But the Plants!"*

At All Around Landscape Supply, we recognize that the products used in our industry have an impact on the local environment where we all live, work, and play. For this reason, AALS offers a full line of organic and earth-friendly products. Some examples include:

- **Organic & earth-friendly fertilizers, soil amendments, herbicides, insecticides, baits, fungicides, and beneficial insects**
- **Smart irrigation products** that can help reduce water consumption
- Components for systems to capture and store **rain runoff** or **gray water** for irrigation purposes, as well as for **recycled water** systems
- **Power Equipment** designed to produce lower emissions, noise, and fuel consumption

AALS is pleased to offer our first catalogue of ***Organic & Earth Friendly Products***. Inside you will find basic information on some of the more popular items we stock or can special order. As always, AALS will expand our product line as local demand justifies it.

Many products in this catalogue are identified as **OMRI Listed**. The ***Organic Materials Review Institute*** (OMRI) is a national nonprofit organization that determines which products may be used in operations that are certified organic under the USDA *National Organic Program*. With the OMRI seal, you can assure your Customers that you are using approved organic products.

Please call Abraham at 431-2625 for pricing and availability for any of the products in this catalogue. He can also assist you to identify just the right organic or earth-friendly products for your needs. *Se habla español.*

We at AALS are committed to serving all of your landscaping product supply needs.

Remember, ***If you don't see what you want – ask us!***

“Everything But the Plants!”

# All Around Organic Compost

Listed & certified organic by OMRI (Organic Materials Review Institute) and CCOF (California Certified Organic Farmers).

## Compare the Difference:

<i>All Around Organic Compost</i>	“Bio-Solid” Compost
	<ul style="list-style-type: none"> <li>• NOT!</li> </ul>
<ul style="list-style-type: none"> <li>• Derived from locally-sourced green waste from Santa Barbara and Ventura Counties.</li> </ul>	<ul style="list-style-type: none"> <li>• Derived from wet sludge (nitrogen source) and dry ground wood (carbon source)</li> </ul>
<ul style="list-style-type: none"> <li>• Fully composted to provide consistency in nutrient levels and aroma, then screened for uniform size.</li> </ul>	<ul style="list-style-type: none"> <li>• Components are turned over while infusing with air, keeping the material dryer. This allows testing to meet minimum EPA standards NOT fully composted.</li> </ul>
<ul style="list-style-type: none"> <li>• Safe to plant garden food crops in – no detectable levels of fecal coli or salmonella.</li> </ul>	<ul style="list-style-type: none"> <li>• Sludge may introduce fecal coli, salmonella, and other bacteria. Heavy metal content is regulated.</li> </ul>
<ul style="list-style-type: none"> <li>• Will not burn plants – All Around Organic Compost is stable when sold, and will not re-activate and heat-up when water is added.</li> </ul>	<ul style="list-style-type: none"> <li>• Less stable – may re-activate with water, producing foul aromas, increased levels of fecal coli and other bacteria, as well as heat that can damage or kill plants.</li> </ul>
<ul style="list-style-type: none"> <li>• Consistent Neutral pH and C/N ratio provides a good balance of Organic matter and Ash.</li> </ul>	<ul style="list-style-type: none"> <li>• Inconsistent pH and ratios.</li> </ul>

***All Around Organic Compost is produced locally from local green-waste, for a lower carbon-footprint than compost trucked in from out of the region.***

# AZOMITE® Soil Sweetener

All Around Landscape Supply is pleased to be the *exclusive* Tri-Counties distributor for **AZOMITE® Soil Sweetener**.

**AZOMITE®** is an OMRI-listed, certified organic product used to re-mineralize soils that have been depleted by plant uptake and normal water erosion. It also provides a natural high quality calcium source to combat soil acidity or "sweeten" the soil, & create an environment where minerals are more available to the plants.

*AZOMITE®* is *not* a manufactured, chemically prepared fertilizer. *It is 100% natural with no additives, synthetics or fillers.* It is a naturally occurring mineral product mined from the site of an ancient volcano in central Utah. The trade name **AZOMITE®** is an acronym for "**A to Z of Minerals Including Trace Elements.**" It requires no mixing, is odorless, won't burn plants and won't restrict aeration or water penetration. The blend is granulated for easy spreading, and comes palletized in 40 lb. sacks.

Chemically, **AZOMITE®** is a hydrated sodium calcium aluminosilicate (HSCAS) containing other minerals and trace elements which the National Research Council recognizes to be essential, including: Nitrogen, Phosphorous pentoxide, Potassium oxide, Calcium oxide, Ferric oxide, Magnesium oxide, Manganese oxide, Silica oxide, Sodium oxide, and Sulfur trioxide.

Of particular interest here in the Santa Barbara region, **AZOMITE®** has shown tremendous results in the treatment of 'Sudden Oak Death.' Details can be found online at [www.suddenoaklife.org](http://www.suddenoaklife.org).

In addition, the owners of the **AZOMITE®** mining rights have initiated a series of ongoing, accredited research studies on landscaping plants & citrus trees. Results of accredited research studies are available online at [www.azomite.com](http://www.azomite.com), and can be summarized as follows:

<b>Scientists report:  Using AZOMITE® as a fertilizer</b>	<b>Larger root systems</b>
	<b>Bigger plants</b>
	<b>More produce</b>
	<b>More trace minerals in produce</b>
	<b>Blight avoidance</b>
	<b>Blight reversal</b>
